## Information for Authors

Full details of how to submit materials for publication in JAAS are given in the Instructions to Authors in Issue 1. Separate copies are available on request.

*The Journal of Analytical Atomic Spectrometry* (JAAS) is an international journal for the publication of original research papers, communications and letters concerned with the development and analytical application of atomic spectrometric techniques. The journal is published twelve times a year, including comprehensive reviews of specific topics of interest to practising atomic spectroscopists and incorporates the literature reviews which were previously published in Annual Reports on Analytical Atomic Spectroscopy (ARAAS).

Manuscripts intended for publication must describe original work related to atomic spectrometric analysis. Papers on all aspects of the subject will be accepted, including fundamental studies, novel instrument developments and practical analytical applications. As well as AAS, AES and AFS, papers will be welcomed on atomic mass spectrometry, X-ray fluorescence/emission spectrometry and secondary emission spectrometry. Papers describing the measurement of molecular species where these relate to the characterization of sources normally used for the production of atoms, or are concerned, for example, with indirect methods of analysis, will also be acceptable for publication. Papers describing the development and applications of hybrid techniques (e.g., GC-coupled AAS and HPLC-ICP) will be particularly welcome. Manuscripts on other subjects of direct interest to atomic spectroscopists, including sample preparation and dissolution and analyte pre-concentration procedures, as well as the statistical interpretation and use of atomic spectrometric data will also be acceptable for publication. There is no page charge.

The following types of papers will be considered.

**Full papers**, describing original work.

**Communications**, which must be on an urgent matter and be of obvious scientific importance. Communications receive priority and are usually published within 2-3 months of receipt. They are intended for brief descriptions of work that has progressed to a stage at which it is likely to be valuable to workers faced with similar problems.

**Reviews**, which must be a critical evaluation of the existing state of knowledge on a particular facet of analytical spectrometry.

Every paper (except Communications) will be submitted to at least two referees, by whose advice the Editorial Board of JAAS will be guided as to its acceptance or rejection. Papers that are accepted must not be published elsewhere except by permission. Submission of a manuscript will be regarded as an undertaking that the same material is not being considered for publication by another journal.

Manuscripts (three copies typed in double spacing) should be sent to: Janice M. Gordon, Editor, JAAS or Dr. J. M. Harnly, US Associate Editor, JAAS.

All queries relating to the presentation and submission of papers, and any correspondence regarding accepted papers and proofs, should be directed to the Editor or US Editor (addresses as above). Members of the JAAS Editorial Board (who may be contacted directly or via the Editorial Office) would welcome comments, suggestions and advice on general policy matters concerning JAAS.

Fifty reprints are supplied free of charge.
