

Additions and Corrections

Zinc Carboxylate Complexes: Structural Characterisation of some Binuclear and Linear Trinuclear Complexes (1986, 1283)

William Clegg, Ian R. Little, and Brian P. Straughan

Page 1286, left-hand column, lines 6—15. Contrary to the results stated, recalibration of the mass spectrum of $[\text{Zn}_2\text{Ni}(\text{MeCH}=\text{CHCO}_2)_6(\text{C}_9\text{H}_7\text{N})_2]$ showed that it is identical to that of $[\text{Zn}_2(\text{MeCH}=\text{CHCO}_2)_4(\text{C}_9\text{H}_7\text{N})_2]$, with no evidence for any Ni-containing fragments.

Triphenylphosphineiminato-substituted Tungsten(VI) Fluorides. Crystal Structure of Tetrafluorobis(triphenylphosphineiminato)tungsten(VI) (1986, 1309)

Herbert W. Roesky, Ulrich Seseke, Mathias Noltemeyer, Peter G. Jones, and George M. Sheldrick

Page 1309, equations (1) and (2). The formulae for complexes (2) and (3) should be changed to $[\text{WF}_5(\text{N}=\text{PPh}_3)]$ and $[\text{WF}_4(\text{N}=\text{PPh}_3)_2]$ respectively.

Page 1309, footnote. The 'i' after 'triphenyl' should be deleted from the name of the complex.
